Southeastern Telephone Company

Incorporated

WADE BURNS, Manager

Rules and Regulations Applying to all Subscribers' Contracts

Classification or Areas as the Basis for Furnishing Telephone Service—Economical operation of the telephone business, to secure protection to the whole body of rate payers and to the business itself, requires that the property be built and operated in accordance with a definite plan under which specified classes of service are regularly furnished in specified areas or types of areas. The Telephone Company therefore does not undertake to furnish any desired class of service at any desired location, nor does it undertake to extend its plants to remote sections where such extension is not warranted by public necessity as distinguished from personal desire, except where protection is afforded.

The general plan for furnishing telephone service as authorized in the General Exchange Tariff is based on a classification of areas by types for the determination of the classes of service available and for the application of rates.

The Telephone Company's obligation to furnish telephone service is dependent upon its ability to procure and retain suitable facilities and rights for the construction and maintenance of the necessary circuits.

When an applicant for service is located outside of the base rate area in territory where new pole line construction is required and the cost of providing the necessary additional poles is more than three times the annual mileage charge for the circuit thereon, connection with the Telephone Company's system is provided in one of the following methods as the applicant may elect:

The subscriber may bear the cost in excess of the amounts specified above providing the poles and pay extra exchange mileage charges for the necessary circuit. Ownership of such poles is vested in the Telephone Company. Maintenance of poles and circuits is at the expense of the Telephone Company.

The subscriber at his own expense may furnish the portion of pole line and circuit from his location to an agreed upon point of connection with the Telephone Company's system. The subscriber is required to main-

tain or bear the expense of maintaining his portion of the pole line and circuit and also to bear the expense of installing and maintaining the station equipment, except that when the station is brought to the Company's central office for repairs, no labor expense incurred for such repairs is charged to the subscriber. The subscriber is charged extra exchange line mileage charges for that portion of the Telephone Company's circuit outside of the base rate area. Ownership of the portion of pole line and circuit provided by the subscriber is vested in the subscriber. Ownership of the station equipment is vested in the Telephone Company.

When a specified type of construction is desired by a subscriber, as for example, when underground service connections are desired in places where aerial drop wires are regularly used to reach subscriber's premises or where the individual requirements of a subscriber make the installation unusually expensive, the subscriber is required to bear the cost of such special construction or installation.

Unauthorized Use of the Telephone—Telephone equipment and facilities are furnished for the use of the subscriber, employees, agents or representatives of the subscriber or members of the subscriber's domestic establishment except in connection with semi-public telephone service and except as the use of the service may be extended to joint users.

All equipment furnished by the Telephone Company shall remain the property of the Company. Such equipment shall not be used for any toll or consideration to be paid by any other person than the subscriber, nor for performing any part of the work of transmitting, delivering or collecting any message, where any toll or consideration has been or is to be paid any party other than the Telephone Company without the written consent of the Company.

Subscribers may not disconnect or remove or permit others to disconnect or remove any apparatus installed by the Telephone Company, except upon the written consent of the Company.

Unauthorized Attachments—The tele-

Rules and Regulations

Applying to all Subscribers' Contracts---Continued

(Continued from Preceding page)

phone equipment, apparatus and lines furnished shall be carefully used and no instrument, appliance or device, of any kind, not furnished by the Telephone Company shall be attached to or in any way used in connection with such telephone equipment, apparatus and lines. In case any instrument, apparatus or device of any kind other than that furnished by the Telephone Company is attached to or connected with any part of the Company's property, the Telephone Company reserves the right to remove such instrument, apparatus or device and to suspend or discontinue service without any claim on the part of the subscriber.

Terms of Payment—The subscriber shall pay monthly currently on demand all charges for exchange service and equipment and shall pay on demand all charges for toll service. The subscriber assumes responsibility for all charges for exchange service and toll messages originating at the subscriber's station, and for toll messages received at the subscriber's station on which the charges have been reversed with the consent of the person called.

All charges due by the subscriber are payable by the subscriber at the Telephone Company's Office or at any other agency duly authorized to receive such payment. If objection in writing is not received by the Telephone Company within thirty days after the bill is rendered, the account shall be deemed correct and binding upon the subscriber.

In the event of abandonment of the station, the non-payment of any sum due or any other violation by the subscriber of the Telephone Company's rules and regulations applying to subscribers' contracts or to the furnishing of service, the Company may without notice, either (a) suspend service until all violations have ceased, or (b) terminate the subscriber's contract without suspension of service or (c) following a suspension of service, sever the connection and remove any of its equipment from the subscriber's premises. When service has been suspended for non-payment of charges, restoration of service is made upon payment of charges due, and in addition a restora-

tion charge of \$1.00.

Uninterrupted Service Not Guaranteed—In view of the possibility of errors and difficulties in the transmission of messages by telephone and the impossibility of fixing in all cases the causes thereof, the subscriber assumes all risks connected with the service, as the Telephone Company cannot guarantee uninterrupted working of its lines and instruments. In case service is interrupted otherwise than by the negligence or wilful act of the subscriber, an allowance is made, computed on the basis of the minimum monthly rate for such of the telephone service, equipment and facilities furnished as are rendered useless or inoperative. Such allowance covers the period the interruption continues after notice in writing is received by the Telephone Company. No other liability shall in any case attach to the Telephone Company.

When suitable arrangements can be made lines of other companies may be used in conjunction with the Telephone Company's lines in establishing wire connection to points not reached by the Telephone Company's lines. In establishing connections with the lines of other companies the Telephone Company will not be responsible or liable for any action of the connecting company.

The Telephone Company will not transmit messages, but offers the use of its facilities when available and will not be liable for errors in transmission or for failure to establish connection. Employees of the Telephone Company are forbidden to accept either oral or written messages to be transmitted over the lines of the Company.

Telegrams by Telephone—Telegrams may be transmitted to and received from telegraph offices by telephone. To send a telegram or cablegram call by name the telegraph company desired. By arrangement with the Western Union Telegraph Company any telephone subscriber may have charges for messages received or sent by Western Union Telegraph Company charged to his telephone and collected with his telephone bill.
