
“COME AND SEE”

AN INVITATION

The Southeast Kentucky Baptist School

BARBOURVILLE, KENTUCKY

Four Important Years

THERE is no more serious matter than the choice of a high school for your boys and girls. High school students are at the transitional period of life, and need the best care and training of both their mental and spiritual nature. The four years spent in high school are too important to let pass in a school that does not give careful attention to the development of character in the student.

We thoroughly realize this, and in addition to doing accredited high school work, we give definite attention to:

1. The development of Christian character in our pupils.
2. Encouraging our students to continue in school until they have the best education possible.
3. Special religious training in the fields of Christian service.
4. We specialize in giving worth-while boys and girls a good start on the road to success.

Look through these pages, and write for further information.

Remember that our expenses are very low:

Board, including room, heat and light, \$18.50 per month.

Tuition in Academic department, \$4.00 per month.

Tuition in grades from \$3.00 to \$3.50 per month.

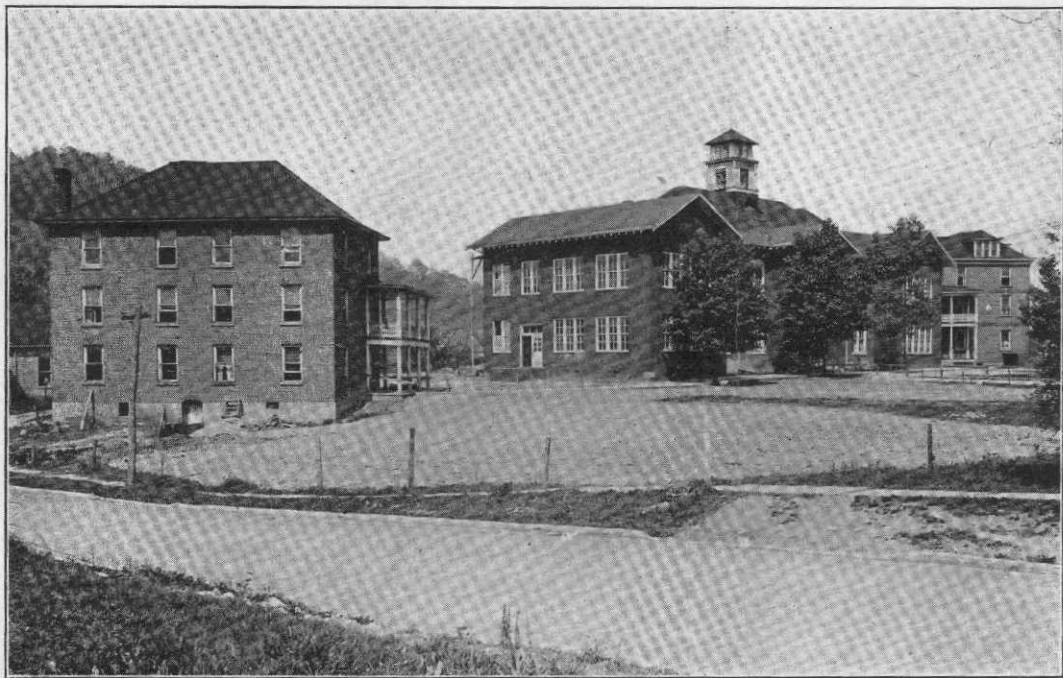

Our Buildings—

The view on the preceding page shows the Administration Building. New improvements have recently been made, providing large and well-lighted class rooms.

The panoramic view on the opposite page shows the Administration Building and the two dormitories.

The Boys Home is shown on the left margin. This building has two good bath rooms, and is steam heated. Every effort is made to have wholesome and home-like influences for the boys who stay in this building.

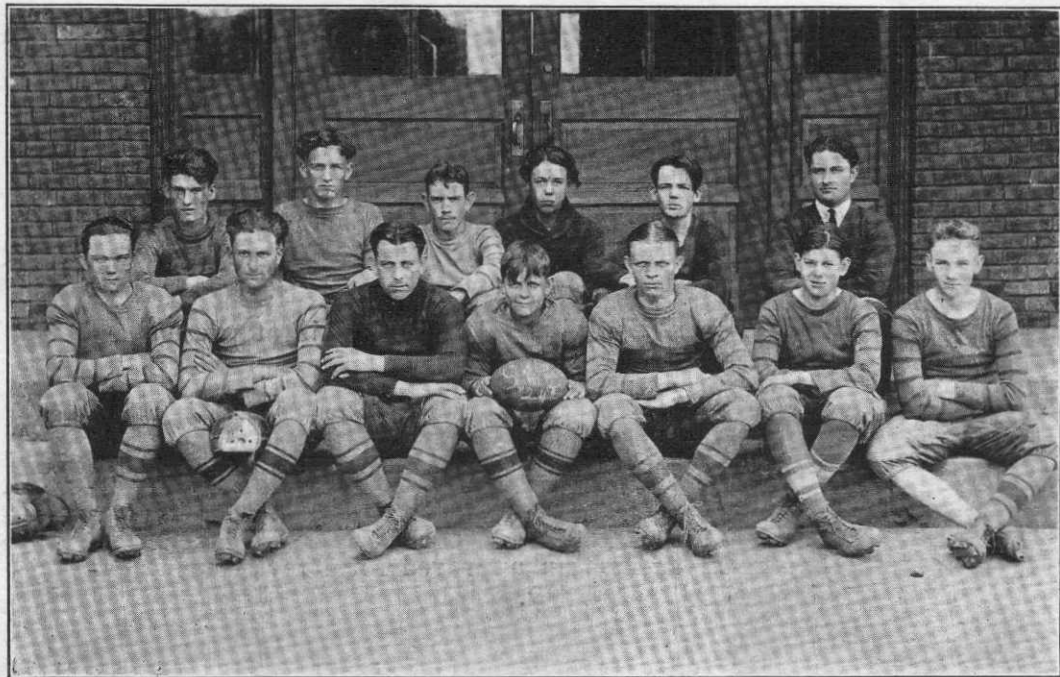

Brown Hall, which is the girls' home, is seen on the extreme right. This building is one of the best equipped of our entire plant. A large dining room for all boarding students is located in the basement. Boarding students have modern conveniences in the dormitories, and are also very close to the school building.

Athletics—

We do not specialize in athletics, but we are proud of our showing in this field. Some views of our athletes are shown. We believe in the all round development of the student, and our athletic program is constructed with that ideal in mind.

Remember, as you study these pictures, that we stress thorough work in the basic studies of the school curriculum. A photograph cannot show this creditable feature of our work. But the mere study of books will not give to young people the best preparation for a complete life. Some means for wholesome play and health-giving exercise are needed.

Our Aim—

A real department of physical education is our aim. This means that our athletic department is conducted, not so much to train winning teams, as it is to secure the best physical development of the pupil. We want our boys and girls to have strong minds in strong bodies.

Our equipment for physical education is at present deficient. We need a good gymnasium, and with the support of our many friends who believe in good health, we hope soon to have such a building.

Schools are coming more and more to realize the importance of caring for the physical well-being of their students. Our students are urged to enter into some athletic games, or have an approved form for securing systematic exercise each day.

For Young Men—

Base ball, foot ball, basket ball, and track teams provide ample opportunity for our young men to develop their bodies along systematic lines.

The importance of games in the development of character is stressed. The boy that learns to play a game energetically, honestly and on the square, and who can also take defeat in good spirit, may be depended upon to play a good part in the game of life.

Many boys find this school a good place in which to begin their athletic career.

Learn to Play—

It is the happy privilege of children and young people to learn to play. Our students are urged to come with that agreeable spirit which will lead them to enter into our school life in all its fullness.

The student that is pleasant and agreeable with his fellows at play, is very likely to become a good citizen in every respect. There is no better place for cultivating the social nature of young people than on the playground.

Much study is being given to making the life of students in the dormitories as pleasant and home-like as possible. Most of our students leave home with the purpose of adapting themselves to the new surroundings, and of helping to make other students happy in their new school home.

Our Girls Not Forgotten—

Our program includes opportunity for the proper physical training of all girls who enroll in the Southeast Kentucky Baptist School.

Good health is a priceless boon, both for boys and girls, and we are anxious in every way possible to secure healthy development of every student that comes under our care.

With our emphasis upon the basic virtues and a thorough grounding in the elemental school subjects, plus a good physical development, our girls are equipped as well as any school can make them for a useful life in the home, or in business.

Preparation for High School—

The picture on the opposite page shows a group of seventh and eighth grade pupils, with their capable instructor, Professor John W. Hughes.

Students who enroll in our graded department are insured of a thorough preparation for high school work here or elsewhere. We have all the grades from the first up. The adopted textbooks are used, and pupils may bring their own books with them for use in the grades here.

Proper preparation in the grades is an important essential for completing a high school course successfully. We do standard grade work, and give to the student many other splendid advantages while doing the regular school work.

For Real Education—

The Southeast Kentucky Baptist School believes in the development of Christian character as a vital essential in all true educational processes.

We are anxious to secure the personal belief of every student in God and His Son, Jesus Christ.

The picture opposite shows the new First Baptist Church of Barbourville, adequately equipped, and rendering valuable co-operation to the school in the religious education of its students. This school seeks to send its students back home as real church workers and good citizens.

There is a vast difference in a school that emphasizes Christian influences, and one that pays no attention to such important matters.

Let Us Help You—

Many parents who glance through this booklet are anxious to get their children in the right school.

We invite such parents to investigate the character and work of this institution at any time. Your inquiries will be received courteously, and any official will be glad to render all personal service possible.

Young men and women, boys and girls, will look through these pages too, while they think seriously about the choice of a school.

Let us help you.

Both parents and young people are invited to write in detail about their educational problems. Some write us about the matter of money; others write to know what school is best to prepare for a certain business or profession; still others have personal problems of their own. We are in the school business and welcome such letters. Write, whether you select this school or not.

Address, The Principal,
Southeast Kentucky Baptist School,
Barbourville, Kentucky.
